PROFILE SUMMARY

AWS-certified DevOps Engineer with 1.5+ year of experience in cloud infrastructure management, Kubernetes orchestration, and Linux automation. Proven track record of deploying containerized workloads on AWS EKS, managing VPC networking, and building CI/CD pipelines with Jenkins and ArgoCD. Hands-on experience with Terraform for IaC and Prometheus/Grafana for observability.

SKILLS

Languages: Python, Java, JavaScript, Bash Scripting

Cloud: AWS (EC2, S3, EKS, ECS, ECR, IAM, CloudWatch, VPC, ALB)

DevOps Tools: Docker, Kubernetes, Jenkins, ArgoCD, Terraform, SonarQube, Trivy, Prometheus, Grafana

Databases: MySQL, PostgreSQL, NoSQL

EXPERIENCE

Devlogic Solutions

DevOps Engineer

Pune

05/2025 – Present

- Provisioned 10+ EC2 instances across multiple VPCs with public/private subnet segmentation, security group rules, and IAM roles with least-privilege policies
- Deployed ALB to distribute inbound traffic across EC2 targets; configured CloudWatch alarms on CPU utilization (90% threshold) and disk usage for proactive incident response
- Authored Bash scripts for automated process monitoring, server health checks, and scheduled S3 backup operations on Linux servers
- Applied Kubernetes rolling update manifests on AWS EKS to maintain zero-downtime deployments during application release cycles
- Supported HPA configuration on EKS cluster with CPU-based scaling policies to handle variable traffic loads

PROJECTS

AWS EKS GitOps Pipeline | Terraform, Jenkins, ArgoCD, EKS, Prometheus, Grafana |

2024

- Infrastructure Automation:** Reduced setup time by 30% using Terraform to provision EKS cluster, VPCs, subnets, and security groups on AWS
- CI/CD Pipeline:** Achieved 95% deployment success rate with zero downtime by implementing a Jenkins-driven pipeline to build, push Docker images, and trigger ArgoCD sync
- GitOps Integration:** Cut manual intervention by 80% through ArgoCD, enabling seamless auto-synchronization between GitHub manifests and EKS cluster
- Monitoring & Alerting:** Improved issue detection time by 40% with Prometheus metrics collection and Grafana dashboards; configured email alerts for critical events
- Impact:** Delivered 99.9% deployment success rate, improved scalability, and reduced manual efforts by 90%, significantly enhancing operational efficiency

DevSecOps Jenkins CI/CD Pipeline | Jenkins, AWS, SonarQube, OWASP, Trivy, Docker, Node.js | [GitHub](#)

2024

- Deployed Jenkins CI/CD server on AWS EC2, automating end-to-end build, test, and deployment pipeline for a Node.js application
- Integrated SonarQube (SAST) for code quality gates, ensuring zero critical vulnerabilities passed to production
- Implemented OWASP Dependency-Check to identify and remediate known CVEs in third-party libraries
- Configured Trivy for container image scanning; pushed hardened Docker images to Amazon ECR for secure versioned deployments

EDUCATION

Prof. Ramkrishna More ASC College, Akurdi

BSc Computer Science

Pune

2022 – 2025

- Represented University in Technical Fest
- Top 3% in Academics
